Abstract. The depository of the holotype of *Cephalaromyia capituli* gen. nov. et sp. nov. is given as an additional information to the article Skuhrová & Karimpour (2017).

Key words. Diptera, Cecidomyiidae, Iran.

In the description of the new species *Cephalaromyia capituli* Skuhrová, 2017 in our mutual article by Skuhrová & Karimpour (2017) we did not give the depository of the holotype of this species. According to the latest ICZN (1999) it is necessary to give such information. We do it in the present publication.

In our publication Skuhrová & Karimpour (2017), on page 56, the following information should be added at the end of the paragraph entitled “Type material”: The holotype and paratypes of the new species are deposited in the collection of Marcela Skuhrová, Prague, Czech Republic.

Acknowledgements

We thank Raymond J. Gagné (Systematic Entomology Laboratory, USDA, Washington, DC, USA) for a kind note in his letter that we had forgotten in our paper to include the place of depository of a new species.
